Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1, and 8-10 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a transmitting means for transmitting an image picked up by an image pick-up means, together with a position information, to an image information server for managing a database of image information being indicative of condition of a road; a receiver means for receiving an image picked up by other terminal being mounted on other car from said image information server; a display means for displaying said image received thereon; and an input device which receives information indicating importance of the image picked up by the image pick-up means; wherein a place or a timing of picking up an image by said image pick-up means is controlled from said image information server, if information indicating importance of the image picked up by the image pick-up means is received by the input device, the transmitter transmits notice information to the image information server so that the image information server distributes the image with priority.

It is noted that the closest prior art of record Bagué (US 6,246,933) teaches a similar transmitting means. However, Bagué fails to particularly teach or suggest “*a receiver means for receiving an image picked up by other terminal being mounted on other car from said image information server; a display means for displaying said image received thereon; and an input device which receives information indicating importance of the image picked up by the image pick-up means; wherein a place or a timing of picking up an image by said image pick-up means is controlled from said image information server, if information indicating importance of the image picked up by the image pick-up means is received by the input device, the transmitter transmits notice information to the image information server so that the image information server distributes the image with priority*” as specified in the claims” as claimed.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
